

About Hastings Riverlands dairy products:

Hastings Riverlands dairy is situated at Huntingdon on the Mid north coast of NSW on the Eggert family's certified organic farm. The on-site processing facility is directly adjacent to the dairy, enabling the end product to be as fresh and authentic as possible.

Jimmy Eggert started operation of the factory in 2023 after finishing his HSC in 2022. So now he is a fifth generation dairy farmer with his own micro-dairy business, milking currently 26 Jersey cows, a breed known for their top quality milk with high fat and protein levels. He is passionate about sustainable and regenerative farming practices and the importance of quality food produced with integrity and passion. What sets his products apart from many others is that he is the producer (farmer), the processor, the marketer and the delivery driver!

His milk and yoghurt is processed using gentle farming and manufacturing methods to maintain its nutritional integrity. The milk is unhomogenised and the yoghurt is pot set with only two ingredients – milk and cultures, which means there is a layer of cream at the top of the yoghurt. It is delicious as it is or with a bit of honey, maple syrup or fruit for extra sweetness.

Hastings Riverland products are available at the following outlets:
